How do the Ring Strategies work with Ring Groups and Follow Me?

o **ringall:** All extensions in the group ring simultaneously.
o **ringall-prim**: see below *
o **hunt:** Takes turns ringing each available extension, in the order as they appear on the list.
o **hunt-prim**: see below *
o **memoryhunt:** Similar to Hunt, but, instead of trying each extension listed individually, it progressively adds the next extension in the list and rings it along with all previous extensions
o **memoryhunt-prim**: see below*
o **firstavailable:** Not applicable. Do not use this setting
o **Firstnotonphone:** Not applicable. Do not use this setting

o ***-prim:** These modes act as described above, with the following behavior:

  o If the "primary" extension (first one listed - 3301 in the screenshot example) is on another line, only it will be rung. The other extensions will not ring.
  o If the primary extension is set to Do Not Disturb, it will not ring, but the other extensions will ring.
  o If the primary extension is set to Call Forwarded Unconditional, then all extensions will ring.

Group Description:	Sales
Ring Strategy:	ringall

Extension List:

3301	ringall
3302	ringall-prim
3303	hunt
	hunt-prim
	memoryhunt
	memoryhunt-prim
	firstavailable
	firstnotonphone
